

Blended Learning Standard PLSS Statement

This course will be delivered through blended learning, with some classes face to face and others online.

Benefits: Flexibility to study from home, reduced travel, opportunities to build digital skills, and access to online materials at your own pace.

Considerations: You will need a reliable internet connection and a suitable device, such as a laptop or desktop computer, as these courses are not designed for use on tablets or mobile devices. Your device should include a camera and microphone, and you should have access to a quiet, appropriate space for online classes. Learners should be able to manage their own study time, stay motivated, and work independently.

Suitability: Blended learning may suit you if you are comfortable using email, video calls and online platforms, and if you can plan your study time effectively. If you have limited access to technology or prefer face-to-face learning, the online elements may be more challenging or unsuitable.

By applying, you accept that the course will include both classroom and online participation.

You will need to ensure that you have a compatible device and the necessary software to participate. Details of the device and software requirements are available in our Blended Learning Specification Guide, which can be accessed via the link in the URL section on the right-hand side, or on our website at www.wwetb.ie under About → Organisation → [Quality\[JR1\]](#) → Teaching and Learning.

The above statement must be included in the Further Details box of the Recruitment Notes section of PLSS. The URL for the specification guide which can be found [here \[JR2\]](#) will need to be inserted in the Course Application URL box which can be found on under the Administration section of the PLSS Details page.
